PUBLIC TRANSPORT BIKE

During block 1 - 4

Mobility Pilot tests the first legal e-scooters
in the Netherlands!

We are proud that TU Delft has tested the first electric scooters
officially allowed on public roads in the Netherlands!

In the mobility pilot scheme 'Travel To Campus the other way',
these kick-assisted e-scooters are being used for the first and last
mile of a journey in combination with public transport, making travel
by public transport even easier.
