**WEATHER & TIMELINE 2019**

**JUNE**  
VERY WARM!

**JULY**  
73 WARM DAYS OF WHICH 11 WERE TROPICAL

**AUGUST**  
SECOND NATIONAL HEATWAVE OF 2019

Tropical day on June 2nd, followed by three more tropical days on June 24th, 26th and 29th.

The summer started variable. May was cool and then suddenly it was 30 degrees on June 2nd. The next day it was only 19 degrees, and then it was warm again the following day.

80 warm days is normal for the summer. There were in total 26 summery days whereas 21 is normal. The number of tropical days in the summer was 11 whereas 4 is normal.

Record of 40° and a national heatwave.

After August 11th, it became cooler and wetter, although it often still reached 20 degrees. After August 20th, the weather became dryer and much warmer.

The last week of August was warm, with which the summer of 2019 did eventually rank among the hotter summers. The second national heatwave of 2019 was a fact on August 27th.
